

Jean Richardson from Luminyscorp sent me this. It looks pretty cool and I have to admit that I've always dug the effect of Softsun lights, if not the mechanics; I am not the person who should be responsible for a 6 foot bulb. Me bull, it china shop. I am concerned that there are only 6 of these 3.5Ks world wide, so I guess it's not the head you're looking for if you have to light a stadium. Again, I have no experience with this light at all, so if anyone has some input, I'll take it. But I do think it's a good idea. Of course, I also think living in Atlanta and working in the film industry is a good idea, so take that for what it's worth.

3K SoftSuns

3K SoftSun™ Series

SoftSun lighting systems create the look of natural sunlight from a soft wide source that wraps around an object without bounce or diffusion. The ESL xenon lamp strikes instantly to full power full color temperature SoftSun units are fully dimmable without any shift in color, maintaining a CRI of 96 or better at a steady 5400°K.

The 3K line of SoftSun units offers the best of SoftSun technology in a small, convenient package, ideal wherever a soft, dimmable daylight source is required.

Also available in larger 10K, 25K, 50K and 100K units.
